DETAILED ACTION

Acknowledgement is made of receipt and entry of the response to the amendment filed on 05/02/2008.

The rejection made under 35 USC 112, second paragraph, set forth in the previous office action has been overcome by Applicant's amendment.

The rejection made under 35 USC 103(a), set forth in the previous office action has been overcome by Applicant's amendment. Therefore, this action is made non-final due to a new ground of rejection.

Claims 19-45 will be examined on the merits.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 19-45 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-24 of copending Application No. 11/470,527.

Although the conflicting claims are not identical, they are not patently distinct from each other because in both cases, the claims are drawn to a method of preparing a soft gel capsule comprising heating rice bran oil and adding a filler to provide a mixture and adding corosolic acid and stirring the mixture and encapsulating the mixture in a soft gel capsule.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claims 19-45 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over Claim 1 of U.S. Patent 6,784,206.

Although the conflicting claims are not identical, they are not patentably distinct from each other because in both cases, the claims are drawn to a method of preparing a soft gel capsule comprising heating rice bran oil and adding a filler to provide a mixture and adding corosolic acid and stirring the mixture and encapsulating the mixture in a soft gel capsule. Further, the instantly claimed invention encompasses the claimed invention of 6,784,206.

Conclusion

No claim is allowed.
